

Presentazione delle giornate

(Benedetta Alosi)

Abstract

The connection between the visibility of research and the reputation of Institutions is an undeniable reality.

The Green Road, supported by mandatory policies for scientific publications and open research data, is definitely between two OA strategies, the one that leads to the immediate and global dissemination of research findings.

The aim of the Road Map 2014-2018 is to promote the implementation of institutional policies in order to maximize the global scientific impact of Italian research.
